

SIGHTRON SIII 8-32X56 SCOPES

KEY FEATURES:

SIII Series One-Piece Main-Tube

All scopes in the SIII series feature a 30mm one-piece Main-Tube made from high quality Aircraft aluminum. Tube thickness is more than twice as thick as one inch models to provide maximum rigidity. All models are fog proof, shockproof and waterproof.

All Weather Construction

This scope features the ultimate in all weather construction. They are waterproof; nitrogen filled and provide a lifetime of internal fog protection for inclement weather.

Fast Focus Eyeball

A European style fast focus eyeball accompanies all SIII SS Long Range Models. A quick turn of the eye bell allows the user to focus in a matter of seconds. Tweaking the eye focus is just a small adjustment away.

ExacTrack

This scope features Sightron's unique ExacTrack windage and elevation adjustment system. No other system on the market comes closest to the precision and performance of ExacTrack.

SIII SS LR Target Knobs 1/4 MOA / 70MOA range

Large oversize target knobs with 1/4 inch adjustments are standard on all models. All models feature target knobs that are re-settable to zero. All target knobs are protected by large heavy windage and elevation caps.

Side Focus System

Side Parallax focus is available on all SIII SS models and SIII SS LR Series Riflescopes. Designed for ease of use in prone and bench shooting the side focus will focus from 10-40 yards to infinity depending on the specific model.

ZACT-7 Revcoat Multi-Coating

All Sightron SIII LR Series Riflescopes feature ZACT-7 seven layer multi-coating with precision ground glass. These lenses provide superior light transmission and resolution for the ultimate in performance.

Sightron offers a Lifetime Warranty. To order Call 780-962-3395 or email sales@rpsinternational.com
